PROJECTS

Welp   Live Site | Github
A Yelp-inspired web-app where users can search local businesses look at reviews of those businesses.
- Constructed a map utilizing Google Map API to display business locations for improved user experience.
- Leveraged Rails model validations and React-Router-DOM to authenticate which pages users can view.
- Incorporated CSS3 flexbox for an appealing website layout.

Whee get Threes   Live Site | Github
A javascript game which is a spin on Threes, a game where users move tiles on a board to merge the tiles increasing the tile number.
- Implemented Object Oriented Programming to optimize readability of the code.
- Incorporated prototypal inheritance for game functionality to create DRY code.

SKILLS

Ruby on Rails, React.js, Ruby, RSPEC, JavaScript, jQuery, Redux, SQL, Git, HTML5, CSS3
